Remarks:

1. The chemical analysis of 151 SVHC is performed by means of currently available analytical techniques against the list published by ECHA on 2013 December 16. Refer to: <http://echa.europa.eu/web/guest/candidate-list-table>;
2. In accordance with Regulation (EC) No 1907/2006, any producer or importer of articles shall notify ECHA, in accordance with paragraph 2 of Article 7, if a substance meets the criteria in Article 57 and is identified in accordance with Article 59(1) of the Regulation, if (a) the substance is present in those articles in quantities totalling over one tonne per producer or importer per year; and (b) the substance is present in those articles above a concentration of 0.1% weight by weight (w/w);
3. Article 33 of Regulation (EC) No 1907/2006 requires supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance;
4. If a SVHC is found over the reporting limit, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by requesting further quantitative analysis from the laboratory.

Примечания:

1. Химический анализ 151 особо опасных вещества (SVHC) указанных в списке, опубликованном Европейским химическим Агентством (ЕХА) 16 декабря 2013, осуществляется с помощью имеющихся в настоящее время аналитических методов. Перечень особо опасных веществ доступен по следующей ссылке: <http://echa.europa.eu/web/guest/candidate-list-table>;
2. В соответствии с Регламентом ЕС № 1907/2006, любой производитель или импортер изделий, уведомляет ЕХА в соответствии с пунктом 2 статьи 7, если вещество отвечает критериям, указанным в статье 57, и определяется в соответствии со статьей 59 (1) Регламента, если (а) общий объем вещества, содержащегося в изделиях, составляет больше 1 тонны на производителя или импортера в год, и (б) вещества, содержащиеся в изделиях, превышают показатель концентрации 0,1% (по массе);
3. Статья 33 Регламента ЕС № 1907/2006 требует от поставщика изделий, содержащих вещества, отвечающие критериям, приведенным в статье 57, и определенным в соответствии со статьей 59 (1) в концентрации выше 0,1% (по массе), предоставить получателю изделий достаточную информацию, имеющуюся у поставщика, позволяющую безопасное использования изделий в том числе, как минимум, название этого вещества;
4. Если концентрация особо опасного вещества (SVHC) выше допустимой, клиенту предлагается определить компонент, который содержит особо опасное вещество (SVHC) и точную концентрацию особо опасного вещества (SVHC) путем запроса дополнительного количественного анализа в лаборатории.
